Ph.D. Tangi Migot

Computational Mathematician

My research interest lies at the interface between theoretical and computational mathematical analysis and includes the following themes.

- **Mathematical Theory:** bilevel optimization; continuous optimization; equilibrium problems (complementarity problems, variational and quasi-variational inequalities); generalized Nash equilibrium problems; Stackelberg games; optimization model with complementarity constraints and cardinality constraints; non-smooth dynamical systems; sparse and large scale optimization.
- **Computational Mathematics:** development of algorithms for degenerate optimization models and equilibrium problems; implementation, complexity, and benchmarking of algorithms; coding of optimization tools in Julia.

These interests are connected, but not limited, to applications in **data science**, equilibrium and kinetics **geochemistry**, **biology** and non-cooperative **game theory**.
From 2015 to 2021, I taught **230hrs** at various levels of the university program both in Europe, in french, and in North America, in english. This includes being **the main lecturer in two classes** with above 100 students and the supervision of teaching assistants (8 overall).
My research activities have been supported by research grants in the amount of approx. **30 000CAD** for mobility grants, support to attend summer school and conferences, and organization of a workshop at the Fields Institute. I currently hold a postdoctoral fellowship of **140 000CAD** from IVADO.

Education

2014 - 2017, IRMAR-INSA de Rennes

PhD in Applied Mathematics.
Advisors: Mounir Haddou and Jean-Pierre Dussault.
Title: Contributions to numerical methods for complementarity problems and mathematical programs with complementarity constraints.
Reviewers: S. Adly (Université de Limoges) and C. Kanzow (University of Würzburg).
Jury: S. Adly (Université de Limoges), J. Erhel (INRIA Rennes), J. C. Gilbert (Président du jury, INRIA Paris), O. Ley (INSA de Rennes) and C. Sagastizabal (Rio de Janeiro).

2011 - 2014, INSA de Rouen

Engineer diploma " Génie mathématique".
End-of-study internship at INRIA Rennes.
Title of the thesis: Mathematical analysis of geochemical models.
Advisor: Jocelyne Erhel.

2013 - 2014, University of Rouen

Master 2 in Fundamental and Applied Mathematics.

Positions

Current position since October , 2020, Polytechnique Montréal

Postdoctoral research associate in the Department of Mathematics and Industrial Engineering financially supported by a grant of IVADO.
Subject: Large scale optimization solvers in Julia for data science.
Principal investigator: D. Orban.

2018 Oct. - 2020 Apr., University of Guelph

Postdoctoral research associate in the department of Math. & Statistics.
Subject: Generalized Nash equilibrium problems and applications.
Principal investigator: M.-G. Cojocaru.
Research visits:

- March 2020 (1 week) in Université d'Avignon (France) invited by Térence Bayen.
- March 2020 (1 week) in Université de Perpignan (France) invited by Florent Nacry.

2018 July. - 2018 Sep., Université de Sherbrooke

Postdoctoral research associate financially supported by a grant of excellence for foreign researches from the FRQNT.
Subject: Coding a solver for degenerate non-linear optimization problems.
Principal investigator: J.-P. Dussault.

2018 Apr. - 2018 Jun., INRIA de Rennes

Postdoctoral research associate in the team FLUMINANCE.
Subject: Numerical aspects of dynamical complementarity problems.
Principal investigator: J. Erhel.

2017 Oct. - 2017 Dec., IETR-INSA de Rennes

Postdoctoral research associate financially supported by Thales and in a collaboration with IRMAR.
Subject: Synthesis and optimization of metasurfaces.
Principal investigators: R. Loison and R. Gillard.

2014 Oct. - 2017 Sep., IRMAR-INSA de Rennes

PhD student with teaching over the period (2015 Sep.-2017 Jun.).
Graduate Internships during the PhD:

- **June-July 2017, in Sherbrooke (Canada)** invited by Jean-Pierre Dussault in Université de Sherbrooke.
- **Sep.-Dec. 2016, in Sherbrooke (Canada)** invited by Jean-Pierre Dussault in Université de Sherbrooke.
- **Nov. 2015, in Beyrouth (Lebanon)** invited by Lina Abdallah in Université Libanaise.

2014 May - 2014 Sep., INRIA de Rennes

Internship in the team SAGE.

Coding Julia Packages

My recent contributions are available on Github, `https://github.com/tmigot`. I am an active contributor in the *JuliaSmoothOptimizers* organization, `https://juliasmoothoptimizers.github.io`, and the founder of the *Julia Optimization and Variational Analysis* Github organization, `https://github.com/JuliaOptimizationVariationalAnalysis`.
List of registered Julia packages for which I am the lead developper:

1. with D. Orban and A.S. Siquiera. *PDENLPModels.jl: A NLPModel API for optimization problems with PDE-constraints*, `https://doi.org/10.5281/zenodo.5056629`, 2021.
2. with D. Orban and A.S. Siquiera. *DCISolver.jl: An optimization solver with dynamic control of infeasibility*, `https://doi.org/10.5281/zenodo.4742979`, 2021.
3. *RandomLinearAlgebraSolvers.jl: randomized methods for linear algebra*, `https://github.com/tmigot/RandomLinearAlgebraSolvers.jl`, 2021.
4. with J.-P. Dussault. *Stopping.jl: A framework to implement iterative algorithms*, `https://github.com/vepiteski/Stopping.jl`, 2020.

Submitted Preprints

1. with M. Haddou, J.-P. Dussault and A. Kadrani. *A unified framework of regularization methods for degenerate non-linear optimization models* HAL, hal-01734832, 2018.
1. with D. Orban and A.S. Siquiera. *DCISolver.jl: A Julia solver for nonlinear optimization using dynamic control of infeasibility*, 2021.

Articles in preparation

1. with D. Orban and A.S. Siquiera. *The JuliaSmoothOptimizers Ecosystem for Linear and Nonlinear Optimization*, to be submitted, 2021.
2. with J.-P. Dussault and S. Goyette. *Stopping: A framework to implement iterative (optimization) algorithms*, to be submitted, 2021.
3. with B. Hamlat and J. Erhel. *A projected dynamical system approach to mineral precipitation-dissolution reactions in geochemistry*, to be submitted, 2020.
4. with M.-G. Cojocaru. *Replicator dynamics and the Folk Theorem for generalized games*, to be submitted, 2020.

Peer Reviewed Conference Publications

1. with M.-G. Cojocaru. *Revisiting path-following to solve the generalized Nash equilibrium problem*, International Conference on Applied Mathematics, Modeling and Computational Science. Springer, Cham, 2019.
2. with L. Abdallah and M. Haddou. *Solving mathematical programs with complementarity constraints with a penalization approach*, World Congress on Global Optimization, pp. 228-237. Springer, Cham, 2019.
3. with L. Abdallah and M. Haddou. *A sub-additive merit function for complementarity problems and application*, Proceedings of the International Conference on Learning and Optimization Algorithms: Theory and Applications. ACM, 2018.
4. with M. Haddou. *A smoothing method for sparse optimization over polyhedral sets*, Springer, Modelling, Computation and Optimization in Information Systems and Management Sciences Proceedings of the 3rd International Conference MCO 2015 - Part I, 359, pp.369-379, 2015, Advances in Intelligent Systems and Computing.

Teaching and Mentoring

Teaching

- **2020-21: 18hrs at Polytechnique Montréal.** Laboratory assistant for a course level master/PhD entitled *Methods for optimization and optimal control*, including the design of the laboratories in Julia.
- **2019-20: 48hrs at the University of Guelph.**
  Responsible for the course MATH 2000 *Proofs, Sets and Numbers*, 36 hrs of lectures, and 12hrs of labs, with 2 teaching assistants. Course for undergraduate students in mathematics (approx. 100 students) introducing mathematical logic, techniques for proofs, and sets. The course uses TopHat active learning tools.
- **2018-19: 56hrs at the University of Guelph.**
  - Guest lecturer in the course *Optimization I*, 8hrs of lectures. Introduction to numerical optimization for graduate students in mathematics;
  - Responsible for the course MATH 2080 *Elements of Calculus II*, 36hrs of lectures, and 12hrs of labs, with 6 teaching assistants. Calculus course for science undergraduate students (approx. 150 students) covering integration techniques, geometry and introduction to differential equations.
- **2017-18: INSA de Rennes.**
  Mentoring of an interdisciplinary project with graduate students.
- **2016-17: 64hrs at INSA de Rennes.**
  - Geometry: 48hrs of tutorials with 2nd year undergraduate students;
  - Optimization: 16hrs of labs with graduate students.
- **2015-16: 64hrs at INSA de Rennes.**
  64hrs of tutorials in bachelor, 1st year calculus.

Teaching Assistants

- **2019-20:** Supervision of 2 teaching assistants for the class *MATH 2000*. Pavel Zarva and Momina Dar: labs, preparation of the midterms, exams and office hours.
- **2018-19:** Supervision of 6 teaching assistants for the class *MATH 2080*. Thomas Kielstra, Comfort Mintah labs, preparation of the midterms, exams and office hours. Katrina Olfert, Eric Fernandes, Pavel Zarva, David Mammarella: invigilating and grading.

Master's Internship

- April to June 2017: *Relaxation methods for MPCC*, Cao Van Kien (Université Paris 13). After the master, he completed a PhD entitled *Modèles Multi-leader-follower : analyse théorique, numérique et application aux éco-parcs industriels* in the Université de Perpignan.
- April to June 2017: *Optimization methods for complementarity problems*, Nguyen Dinh Duong (Université Paris Est). After the master, he started a PhD entitled *Quelques résultats sur des modèles de turbulence* in the Université de Rennes.

Administrative and Scientific Responsibilities

Organization of Scientific Events

- Co-organizer of the online workshop *dynamics, optimization and variational analysis in applied games* with the Fields Institute in Toronto in Apr. 30-May 1st 2020
- Co-organizer of the session *Continuous optimization and applications* in AMMCS-19 conference in Waterloo (6 talks).
- Co-organizer of the stream *Variational analysis, games and intertwined optimization problems* in EURO 19 conference in Dublin (18 talks).
- Member of the organizing committee of the Groupe de Travail Programmation Mathématique du Groupe de Recherche en Recherche Opérationnel 2016 à Rennes, June 13-14.
- Member of the organizing committee of the conference HJNET 2016 in Rennes, May 30-June 3.

2014 - 2017, Administrative Responsibilities

Member of the council of IRMAR-INSA.

Grants and Scholarships

2020, IVADO Canada
Post-doctoral grant of **140 000 CAN$** for two years at IVADO (Institute for Data Valorization) on a project called *Large scale optimization solvers in Julia for data science*.

2019, Fields Institute
Grant of **10 550 CAN$** (6 650 CAN$ from the Fields Institute and 3 900CAN$ from the NSF) for logistical and funding support for workshop *dynamics, optimization and variational analysis in applied games* to be held at The Fields Institute April 30th-May 1st.

2019, ICCOPT 19 Berlin
Travel grant of **400€** to attend the conference and the summer school.

2019, PGMO Project
Research projet supported in the amount of **6500€**. The project entitled *ORACLE: Optimal Resource Allocation in micro-organisms under Changing Environment* supports 7 french researchers experts in biology, optimal control and optimization.

2018, Fonds de recherche du Québec - Nature et technologies (FRQNT)
Post-doctoral grant of excellence for foreign researches from the FRQNT of **12 000 CAN$**.

2017, Groupe de Recherche en Recherche Opérationnelle
Mobility grant of **700€**.

2017, École des Docteurs de l'Université Bretagne-Loire et du Conseil Régional de Bretagne
Mobility grant of **1 000€**.

2016, École des Docteurs de l'Université Bretagne-Loire et du Conseil Régional de Bretagne
Mobility grant of **2 000€**.

2016, COST/MINO
Grant to join COST/MINO PhD School of **500€**.

2014 - 2017, Ministère Enseignement Supérieur et de la Recherche
PhD scholarship awarded by the country state of **68 811,96€**.

Mathematics Outreach Activities

2021, Montréal IVADO/MILA (Canada)

Natural Language Processing Workshop Series: Question answering: from the document to the excerpt. For 2 sessions, Siva Reddy (McGill University - MILA) shared his knowledge and the latest developments in Natural language processing in the marketing field.

2021, Montréal IVADO/MILA (Canada)

6th IVADO/Mila Deep Learning School. School with 45hrs from March 30 to April 29, 2021, with online courses and laboratories on: machine learning, deep learning and optimization - convolutional neural networks, recurrent neural networks - biais and discrimination in AI. By Gaëtan Marceau Caron, Golnoosh Farnadi, AJung Moon, Jeremy Pinto, Mirko Bronzi.

2019, Berlin (Germany)

Summer school at the TU Berlin: *Large scale and PDE constrained optimization* par J.-C. De los Reyes and T. Munson, *Optimization and Machine Learning* par P. Richtàrik.

2016, Rome (Italy)

COST/MINO PhD School on Advanced Optimization Methods: *Polyhedral Combinatorics* by S. Dey, *Interior Point methods* by J. Castro, *Structured Dantzig-Wolfe Decomposition* by A. Frangioni, *Semidefinite Programming* by V. Piccialli.

2016, Nice (France)

SEME (1 week math problem posed by a company) *Re-calibration de modèles pharmacocinétiques.* for ExactCure.

2014, Rouen (France)

SEME *Modelling Gas Regulators* for GCE group.
